

Curcumatrix

A liposomal curcumin that is highly bioavailable, soy-free and clinically dependable.

Gluten Free

Soy Free

Dairy Free

SKU	Size	Format
193134	90 Softgels	Softgels
193135	180 Softgels	Softgels

- 60:1 curcumin extract provides the dried herb equivalent of 2,520mg per softgel
- Non-soy liposomal formulation achieves one of the highest blood levels of curcumin (up to 333 ng/mL) compared to other curcumin formulations
- 7.5x more bioavailable when compared to a standard curcumin extract and 5x more bioavailable than soy-based liposomal curcumin formulas
- Indicated for acute and chronic inflammatory conditions such as osteoarthritis, rheumatoid arthritis, mood disorders and cardiovascular disease
- Available in both 90-softgel and 180-softgel bottles

Curcumin has become one of the most widely researched and supplemented herbal extracts in the world. As the active ingredient found in turmeric root, curcumin has a wide variety of health applications. Curcumin's health benefits can generally be attributed to its anti-inflammatory and anti-oxidant actions, inhibiting the action of NF-

Kappa B and decreasing TNF-alpha levels for chronic inflammatory conditions.

Clinically, curcumin is best known for its ability to reduce pain, decrease stiffness and increase range of motion in chronic pain conditions such as osteoarthritis and rheumatoid arthritis. Research trials have also shown that curcumin can benefit other conditions with obvious inflammatory processes like inflammatory bowel disease and post-exercise muscle soreness. However, an explosion of recent research has found that curcumin can benefit conditions as diverse as mood disorders, poor cognition, hypertriglyceridemia, diabetic blood sugar regulation and allergic rhinitis.

The problem with curcumin is that it is poorly bioavailable in its natural form. This limits its potential as an effective health supplement. Fortunately, Cyto-Matrix's Curcumatrix represents a significant technical advancement by providing an extremely concentrated curcumin in a liposomal formula that is uniquely soy-free and highly bioavailable.

Each Curcumatrix softgel contains 42mg of curcumin in a 60:1 extract to provide a dried herb equivalent of 2,520mg of curcumin. Moreover, the

liposomal formula actually increases the bioavailability by 7.5x when compared to a standard curcumin extract and by 5x when compared to soy-based liposomal curcumins. Bioavailability studies have shown peak blood levels of curcumin reach 333 ng/mL after 5 hours with 2 capsules of Curcumatrix. This is significantly greater than most curcumin formulas, with peak blood levels typically only reaching <50 ng/mL. Collectively, the concentrated curcumin extract and unique liposomal formula makes Curcumatrix a predictable and dependable option for acute and chronic inflammatory processes.

Each softgel contains

Turmeric Supercritical Extract 42mg
(rhizome, *Curcuma longa*) 60:1 DHE 2520mg

Non-Medicinal Ingredients

Citric acid, polysorbate-80. Capsule: gelatin.

Recommended Use Claim

Provides antioxidants for the maintenance of good health.

Directions of Use

Adults - Take 1 softgel, 1-3 times per day or as directed by a healthcare professional.

Cautions and Warnings

Do not use if safety seal is broken. Consult a healthcare professional prior to use especially if you are pregnant, or if you have gallstones, a bile duct obstruction, stomach ulcers or excess stomach acid. Consult a healthcare professional if symptoms persist or worsen.

Storage Conditions

Do not use if safety seal is broken.
