

Peak·EPA

High dose and molecularly distilled omega-3 fatty acids for improved patient compliance: 700mg of EPA and 350mg of DHA in each softgel.

Gluten Free

Dairy Free

SKU	Size	Format
193144	90 Softgels	Softgels
193145	180 Softgels	Softgels

- Each softgel delivers a minimum of 700mg EPA and 350mg DHA, sourced from wild deep sea fish
- Molecularly distilled to ensure the end product is free from heavy metals, organophosphate compounds and unwanted contaminants
- Lightly flavoured with food grade essential oil of lime
- Indicated for systemic inflammatory conditions such as rheumatoid arthritis, autoimmunity, cognitive decline, eczema and atopic concerns
- Available in 90 softgel and 180 softgel bottles

The modern diet has seen a drastic reduction in the intake of omega-3 fatty acids, compounded by a significantly greater intake of omega-6 fatty acids. This is problematic as many of our tissues rely on fatty acids for proper synthesis and communication. If the appropriate fatty acids are not available, the implications for overall health are serious. Ultimately, a relative deficiency of omega-3 fatty acids can lead

to a pro-inflammatory state and increase the risk of chronic disease.

The active compounds responsible for the widespread benefits of fish oil supplementation have been identified as eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). Although both are important for various aspects of human health, EPA is generally regarded as the anti-inflammatory fatty acid while DHA is more responsible for neurodevelopment and nerve protection.

EPA and DHA have been clinically studied in a variety of health conditions. For example, supplementation with these omega-3 fatty acids have been found to be beneficial for maintaining cardiovascular health, rheumatoid arthritis, autoimmunity, cognition, mood, skin health and atopic concerns, to name just a few clinical indications. Simply put, EPA and DHA should be considered for any systemic inflammatory condition.

One challenge that arises with omega-3 fatty acid supplementation is poor compliance. Most supplements require many capsules or teaspoons per day to achieve an evidence-based dose of EPA

and DHA. Cyto-Matrix's Peak-EPA solves this problem by providing 700mg of EPA and 350mg of DHA in a single softgel. These omega-3 fatty acids, sourced from wild deep sea fish, are found in the well-researched ethyl ester form, allowing for evidence-based, extremely concentrated and cost-effective delivery.

Peak-EPA is molecularly distilled, ensuring purity and removal of harmful compounds such as heavy metals and organophosphates. Vitamin E is added to the formula to protect against and prevent oxidation.

Available in 90 and 180 softgel bottles.

Each softgel contains

Fish Oil	1400mg
(anchovies, sardines, salmon)* *From wild deep sea fish, molecularly distilled	
EPA	700mg
(Eicosapentaenoic Acid)	
DHA	350mg
(Docosahexaenoic Acid)	

Non-Medicinal Ingredients

Vitamin E, natural citrus (lime) essential oil. Capsule: gelatin, glycerine, purified water.

Recommended Use Claim

This marine lipid complex is a source of EPA and DHA for the maintenance of good health. Helps maintain cardiovascular health and reduce serum triglycerides. In conjunction with conventional therapy, helps to reduce the pain of rheumatoid arthritis in adults. Helps to promote healthy mood balance. Helps support cognitive health. Helps support the development of brain, eyes and nerves in children up to 12 years of age.

Directions of Use

Adults - 2 softgels, 1-2 times per day. For rheumatoid arthritis - 1 softgel 3 times per day.

For promoting healthy mood balance - 1 softgel, 2 times per day. Adolescents (14-18 years) - 1 softgel, 1-2 time(s) per day. Children (9-13 years) - 1 softgel, 1 time per day.

Cautions and Warnings

Do not use if safety seal is broken.

Storage Conditions

Do not use if safety seal is broken.
