193177	300 g	Powder	

Collagen peptides specifically designed to improve the quality of skin, hair and nails. Clinically proven to reduce eye wrinkles in 4 weeks.

- Contains small peptides of only 4-5 amino acids (2kDa) in weight, thereby improving absorption and minimizing the need for digestion
- Clinically proven to reduce eye wrinkles in 4 weeks, speed nail growth, reduce nail chipping and reduce cellulite appearance after 2 to 3 months
- Each 10ml serving contains an evidence-based dose of 2.5g of bioactive collagen peptides per day, allowing for improved patient compliance
- 45 servings per bottle

Collagen is the major structural component of skin, hair, nails, joints and bones.

In order to localize collagen production, Dermal Collagen Peptides use leading bioactive peptides, clinically proven to target collagen production and counter collagen decline - directly at dermal tissue. Dermal Collagen Peptides consist of Type I and Type III bovine peptides known as VERISOL®. These

peptides specifically signal and simulate fibroblast cells to synthesize collagen production in the skin and nails. Their amino acid profile is predominantly made up of small peptides in the range of 4-5 amino acids (2kDa or Kilodaltons) or less. This is important because small peptides allow for absorption of the entire peptide chain without being broken down during digestion.

Multiple, double-blind, randomized placebo controlled trials have been published on these bioactive peptides and proven their effectiveness for skin health. Research has found that supplementing for 4 weeks with these bioactive peptides can increase skin elasticity by up to 15% and increase collagen content by 60%.

Incredibly, a reduction in the visibility of fine wrinkles has also been noted after only 4 weeks, with reductions in cellulite content of the skin after 3 months. Unlike most cellulite products on the market which focus on fat reduction or improving circulation, these bioactive and small peptides uniquely stimulate the formation of extracellular matrices within the skin.

When it comes to nail health, research has shown less chipping and faster nail growth after 2 months

and 3 months, respectively, of supplementation with these bioactive peptides.

Dermal Collagen Peptides contain 450ml of bioactive peptides per bottle. This allows for a total of 45 servings at the evidence-based dosage of 2.5g per day.

Each 10mL serving contains

Hydrolyzed Collagen	2.5g
(Verisol® Bioactive Collagen Peptides™ Type I and III (bovine))*	

*VERISOL® and BIOACTIVE COLLAGEN PEPTIDES® are registered trademarks of GELITA AG.

Non-Medicinal Ingredients

Beta-carotene, citric acid, natural orange flavour, potassium sorbate, purified water, sugars (xylitol, stevia).

Recommended Use Claim

Helps with the appearance of smooth skin. Helps reduce wrinkles and fine lines. Helps increase skin elasticity. Helps promote healthy collagen production. Helps reduce eye wrinkles within 4 weeks.

Directions of Use

Adults (19 years and older) - Take 1-2 servings per day.

Cautions and Warnings

Consult a healthcare professional prior to use if • you are pregnant • you are breastfeeding • you have liver disease • you have kidney disease • you have been instructed to follow a low protein diet. May cause mild gastrointestinal disturbances. Keep out of reach of children.

Known Adverse Reactions

May cause mild gastrointestinal disturbances.

Storage Conditions

Shake before use. Refrigerate after opening. Do not use if safety seal is broken.
