- Antioxidant support for healthy immunity, skin health, tissue healing, male fertility, thyroid function and hormone balancing
- Upgraded formula provides vitamin A in its active all-trans-retinyl palmitate form, a mixed tocopherol blend and fully chelated bis-glycinate minerals
- Available in 60 vegetable capsule and 120 vegetable capsule bottles

A number of vitamins and minerals have proven essential for antioxidant support and have found their place in the treatment of chronic disease. Specifically, vitamins A, C and E, selenium and zinc are all involved in a complex network of antioxidants, needed to regenerate one another, encourage detoxification, build glutathione and prevent cellular damage. For this reason, Cyto.Matrix has upgraded its original A·C·E·S + Zinc formula to provide active, highly absorbable and well-balanced

antioxidant support for a wide variety of clinical indications.

Active A·C·E·S + Zn should be considered in cases of poor immunity. Collectively, vitamins A, C and E, selenium and zinc help to ensure proper immune function and reduce the frequency of common infections. The combination of these nutrients provides a direct and potent anti-viral action, making the formula useful in both chronic and acute viral infections.

Active A·C·E·S + Zn is also a powerhouse antioxidant formula for men's and women's health. For example, male infertility is often a result of free radical damage and mitochondrial disruption leading to abnormal sperm parameters. The vitamins and minerals in Active A·C·E·S + Zn have been individually studied for their ability to improve both sperm count and sperm function, and zinc can improve testosterone levels in zinc-deficient men. At the same time, research has shown that Vitamins C and E, alone and in combination, are capable of increasing blood levels

of progesterone in women. Animal studies have found the same for selenium supplementation. In both men and women experiencing low thyroid function, selenium is needed for proper conversion of T4 to T3 and zinc is beneficial for improving thyroid receptor sensitivity.

Finally, the nutrients found in Active A·C·E·S + Zn are crucial for collagen production and tissue healing. This formula should be considered in cases of acne vulgaris, acne rosacea, psoriasis, eczema and any skin condition to reduce irritation and improve healing. In cases of trauma such as surgery, bone fractures or open wounds, Active A·C·E·S + Zn can increase collagen synthesis and help to regenerate the skin, bone and structural tissues.

Compared to the original A·C·E·S + Zinc formula, Active A·C·E·S + Zn provides vitamin A in its active all-trans-retinyl palmitate form (instead of beta-carotene), a mixed tocopherol blend (instead of dl-alpha-tocopherol) and fully chelated bis-glycinate minerals (as opposed to citrate salts). Collectively, this makes Active A·C·E·S+ Zn an evidence-based blend of active, highly absorbable and balanced nutrients for antioxidant support. Available in 60 vegetable capsule and 120 vegetable capsule bottles.

Each capsule contains

Vitamin C	300mg
(ascorbic acid)	
Mixed tocopherol concentrate	89mg
Selenium	55mcg
(Albion™ selenium glycinate complex)	
Zinc	12.5mg
(Albion™ zinc bis-glycinate chelate)	
Vitamin A	2500IU (755.5mcg RAE)
(all-trans retinyl palmitate)	

*Minerals supplied by Albion Laboratories, Inc.

 Albion™ is a registered trademark of Albion Laboratories, Inc. U.S. Patent 7,838,042.

Non-Medicinal Ingredients

Vegetable-grade magnesium stearate, silica, dicalcium phosphate, microcrystalline cellulose.
Capsule: hypromellose.

Recommended Use Claim

Source of antioxidants for the maintenance of good health. Helps to maintain healthy skin, eyesight, skin membranes and immune function. Helps in the development and maintenance of teeth, gums, bones, and cartilage. Helps in connective tissue formation and wound healing.

Directions of Use

Adults - Take 1 capsule, 2 times per day with meals or as directed by a healthcare professional. Take a few hours before or after other medication.

Cautions and Warnings

Do not use if safety seal is broken. Consult a healthcare professional prior to use, especially if you have a history of non-melanoma skin cancer.

Storage Conditions

Do not use if safety seal is broken.
