- Provides a blend of deglycyrrhized licorice root (DGL) and slippery elm in highly potent extracted forms
- Indicated for reducing inflammation and irritation to the digestive tract lining and preventing damage to the digestive tract as a result of anti-inflammatory medications
- Can be used adjunctively with **GI-Matrix** powder
- 120 vegetable capsules per bottle

Irritation to the digestive tract lining can occur under many circumstances, leading to inflammation and symptoms of abdominal pain, heartburn, gas, bloating and more. Traditionally, specific herbs have been used to soothe and coat the gastrointestinal lining under such circumstances, providing a mucoprotective action. These herbs are known as demulcents.

Demulcents are effective in treating conditions of the gastrointestinal tract. They act by preventing microbe binding to cell membranes, binding

excessive water, improving microcirculation and acting as a direct physical barrier in the digestive tract. Deglycyrrhized licorice (DGL), *Althea officinalis* (marshmallow root) and *Ulmus rubra* (slippery elm) are some of the most well-established demulcents with clinical efficacy.

DGL is a form of licorice root that has removed glycyrrhizin, a constituent that is responsible for

increasing cortisol and fluid retention. This allows for a soothing effect on the gastrointestinal lining with minimal safety concerns. DGL has been studied for its ability to effectively treat the symptoms associated with damaged gastric and duodenal linings. Moreover, chewing DGL has also shown to have a positive effect on the gastrointestinal mucosa and some evidence suggests that DGL can help to prevent damage to the digestive tract lining caused by non-steroidal anti-inflammatory drugs (NSAIDs). Marshmallow root and slippery elm have anecdotally been used for decades as safe and effective demulcents to treat reflux esophagitis, gastritis, diarrhea, respiratory concerns and even inflammatory skin lesions.

GI-Soothe provides DGL, marshmallow root and slippery elm in high-potency extracts for effective demulcent and mucoprotective effects on the gastrointestinal tract. Available in 120 vegetable capsule bottles.

Each vegetable capsule contains

Marshmallow 250mg
(root, *Althea officianalis*) 20:1 extract equivalent to 5000mg of dry root

Slippery Elm 250mg
(bark, *Ulmus rubra*) 4:1 extract equivalent to 1000mg of dry bark

Deglycyrrhizinated licorice 225mg
(root, *Glycyrrhizae group*) 10:1 extract equivalent to 2250mg of dry root

Non-Medicinal Ingredients

Hypromellose, magnesium stearate.

Recommended Use Claim

Traditionally used in Herbal Medicine to relieve mild inflammation of the gastro-intestinal mucosa (e.g. gastritis) Traditionally used in Herbal Medicine to relieve the irritation of the oral and pharyngeal mucosa and associated dry cough. Used in Herbal Medicine to help relieve abdominal pain and burning sensation in the stomach.

Directions of Use

Adults (19 years and older) - Take 1 capsule, 2 times per day. Take a few hours before or after other medications or natural health products.

Cautions and Warnings

Ask a healthcare professional prior to use if • you are pregnant • you are breastfeeding. Ask a healthcare professional if • symptoms persist or worsen. Keep out of reach of children.

Storage Conditions

Do not use if safety seal is broken.
